v. 30 [no. 5] p. 1684-1685.

The melting diagram of system 2,4-dinitrophenol-thiourea was obtained by the visual-capillary method. The formation of two chemical compounds of the berthollid type was established (complex addition products) of composition $C_6H_3(NO_2)_2OH \cdot CS(NH_2)_2$ and $4C_6H_3(NO_2)_2OH \cdot CS(NH_2)_2$. The difference in the microstructure of both compounds was demonstrated. By the melting of 2,4-dinitrophenol and thiourea the formation of dinitroaniline which is formed by the interaction of dinitrophenol with urea was not observed. (Author)
